LINEAR ALGEBRA and Its Applications

Volume 5
1972

Contents:

R. C. THOMPSON (Santa Barbara, California)
Principal Submatrices IX: Interlacing Inequalities for Singular Values of Submatrices 1

MARVIN MARCUS AND RUSSELL MERRIS (Santa Barbara, California)
Antiderivations on the Exterior and Symmetric Algebras 13

MARVIN MARCUS AND HENRYK MINC (Santa Barbara, California)
An Inequality for Schur Functions 19

ABRAHAM BERMAN (Montreal, Canada) AND PRABHA GAIHA (Evanston, Illinois)
A Generalization of Irreducible Monotonicity 29

ROMESH SAIGAL (Berkeley, California)
On the Modularity of a Matrix 39

R. WESTWICK (Vancouver, British Columbia, Canada)
Spaces of Linear Transformations of Equal Rank 49

KATTA G. MURTY (Ann Arbor, Michigan)
On the Number of Solutions to the Complementarity Problem and Spanning Properties of Complementary Cones 65

IRVING JACK KATZ (Washington, D.C.)
Remarks on Two Recent Results in Matrix Theory 109

J. KAPOOR (Vancouver, British Columbia, Canada)
n-Square Matrices which, under Row Permutations, Leave the $(n-1)$th Elementary Symmetric Function Invariant 113

RICHARD W. COTTLE AND JACQUES A. FERLAND (Stanford, California)
Matrix-Theoretic Criteria for the Quasi-Convexity and Pseudo-Convexity of Quadratic Functions 123

A. J. HOFFMAN (Yorktown Heights, New York)
Eigenvalues and Partitionings of the Edges of a Graph 137

OLGA TAUSSKY (Pasadena, California)
The Role of Symmetric Matrices in the Study of General Matrices . . 147

KY FAN (Santa Barbara, California)
Generalized Cayley Transforms and Strictly Dissipative Matrices 155

GORDON PALL (Baton Rouge, Louisiana)
Partitioning by Means of Maximal Isotropic Subspaces 173

HENRYK MINC (Santa Barbara, California)
Nearly Decomposable Matrices 181

G. N. DE OLIVEIRA (Coimbra, Portugal)
On the Characteristic Vectors of a Matrix 189

ROY B. LEVOW (Boca Raton, Florida)
A Problem of Mirsky Concerning Nonsingular Doubly Stochastic Matrices 197

GERALD L. THOMPSON (Pittsburgh, Pennsylvania) AND ROMAN L. WEIL (Chicago, Illinois)
The Roots of Matrix Pencils ($Ay = \lambda By$): Existence, Calculations, and Relations to Game Theory 207

BERNARD W. LEVINGER (Fort Collins, Colorado)
A Generalization of the Camion-Hoffman Theorem 227

KIM KI-HANG BUTLER (Pembroke, North Carolina)
The Number of Idempotents in (0, 1)-Matrix Semigroups 233

LUCK J. WATFORD, JR. (Troy, Alabama)
The Schur Complement of a Generalized M-matrix 247

INGRAM OLKIN AND ALLAN R. SAMPSON (Stanford, California)
Jacobians of Matrix Transformations and Induced Functional Equations . 257

DAVID SANKOFF (Montreal, Quebec)
Context-Free Grammars and Nonnegative Matrices 277

R. J. PLEMMONS (Knoxville, Tennessee)
Graphs and Nonnegative Matrices 283

DAVID CARLSON (Corvallis, Oregon)
Inequalities for the Degrees of Elementary Divisors of Modules 293

MIROSLAV FIEDLER (Praha, Czechoslovakia)
Bounds for Eigenvalues of Doubly Stochastic Matrices 299

ALFRED BRAUER AND IVEY C. GENTRY (Winston Salem, North Carolina)
Some Remarks on Tournament Matrices 311

DANIEL L. DAVIS (Monterey, California) AND DONALD W. ROBINSON (Provo, Utah)
Generalized Inverses of Morphisms 319

FRANK L. SALZMANN (Auburn, Alabama)
A Note on Eigenvalues of Nonnegative Matrices 329

V. LOVASS-NAGY AND D. L. POWERS (Potsdam, New York)
A Note on Block Diagonalization of Some Partitioned Matrices 339

MARC ATTEIA (Toulouse, France)
Systèmes Polarisés Noyaux Diminutifs de Variation 347

CARL D. MEYER, JR. (Raleigh, North Carolina)
The Moore-Penrose Inverse of a Bordered Matrix 375

JOSEPH B. DEEDS (Columbia, South Carolina)
Uniqueness of Symmetric Norms for Matrix Rings 383

R. E. CARLSON (West Mifflin, Pennsylvania)
A Note on Intrinsic Functions 393

AUTHOR INDEX—Volume 5, 1972 397

Title Index

Bordered matrix, the Moore-Penrose inverse of a
(Meyer), 375

Camion-Hoffman theorem, a generalization of the
(Levinger), 227

Cayley transforms and strictly dissipative matrices, generalized
(Fan), 155

Characteristic vectors of a matrix, on the
(de Oliveira), 189

Complementarity problem and spanning properties of complementary cones, on the number of solutions to the
(Murty), 65

Complementary cones, on the number of solutions to the complementarity problem and spanning properties of
(Murty), 65

Decomposable matrices, nearly
(Minc), 181

Diagonalization of some partitioned matrices, a note on block
(Lovass-Nagy, Powers), 339

Dissipative matrices, generalized Cayley transforms and strictly
(Fan), 155

Divisors of modules, inequalities for the degrees of elementary
(Carlson), 293

Eigenvalues and partitionings of the edges of a graph
(Hoffman), 137

Eigenvalues of doubly stochastic matrices, bounds for
(Fiedler), 299

Eigenvalues of nonnegative matrices, a note on
(Salzmann), 329

Exterior and symmetric algebras, anti-derivations on the
(Marcus, Merris), 13

Game theory, the roots of matrix pencils $(Ax = \lambda By)$: existence, calculations, and relations to
(Thompson), 207

Grammars and nonnegative matrices, context-free
(Sankoff), 277

Graph, Eigenvalues and partitionings of the edges of a
(Hoffman), 137

Graphs and nonnegative matrices
(Plemmons), 283

Idempotents in (0, 1)-matrix semigroups, the number of
(Butler), 233

Inequalities for the degrees of elementary divisors of modules
(Carlson), 293

Inverse of a bordered matrix, the Moore-Penrose
(Meyer), 375

Inverses of morphisms, generalized
(Davis, Robinson), 319

Isotropic subspaces, partitioning by means of maximal
(Pall), 173

Jacobians of matrix transformations and induced functional equations
(Olkin, Sampson), 257

Linear transformations of equal rank, spaces of
(Westwick), 49

M-matrix, the Schur complement of a generalized
(Watford), 247

Matrix pencils $(Ay = \lambda By)$: existence, calculations, and relations to game theory, the roots of
(Thompson), 207

Matrix theory, remarks on two recent results in

(Katz), 109
Modularity of a matrix, on the
(Saigal), 39
Monotonicity, a generalization of irreducible
(Berman, Gaiha), 29

Nonnegative matrices, A note on eigenvalues of
(Salzmann), 329
Nonnegative matrices, context-free grammars and
(Sankoff), 277
Nonnegative matrices, graphs and
(Plemmons), 283
Norms for matrix rings, uniqueness of symmetric
(Deeds), 383

Partitioned matrices, a note on block diagonalization of some
(Lovass-Nagy, Powers), 339
Partitioning by means of maximal isotropic subspaces
(Pall), 173
Partitionings of the edges of a graph, eigenvalues and
(Hoffman), 137
Polarisés noyaux diminutifs de variation, systèmes
(Atteia), 347
Principal submatrices IX: Interlacing inequalities for singular values of submatrices
(Thompson), 1
Pseudo-convexity of quadratic functions, matrix-theoretic criteria for the quasi-convexity and
(Cottle, Ferland), 123

Quadratic functions, matrix-theoretic criteria for the quasi-convexity and pseudo-convexity of
(Cottle, Ferland), 123
Quasi-convexity and pseudo-convexity of quadratic functions, matrix-theoretic criteria for the
(Cottle, Ferland), 123

Rings, Uniqueness of symmetric norms for matrix
(Deeds), 383

Schur complement of a generalized M-matrix, the
(Watford), 247
Schur functions, an inequality for
(Marcus, Minc), 19
Semigroups, the number of idempotents in (0, 1)-matrix
(Butler), 233
Spanning properties of complementary cones, on the number of solutions to the complementarity problem and
(Murty), 65
n-square matrices which, under row permutations, leave the $(n-1)$th elementary symmetric function invariant
(Kapoor), 113
Stochastic matrices, a problem of Mirsky concerning nonsingular doubly
(Levow), 197
Stochastic matrices, bounds for eigenvalues of doubly
(Fiedler), 299
Symmetric algebras, antiderivations on the exterior and
(Marcus, Merris), 13
Symmetric function invariant, n-square matrices which, under row permutations, leave the $(n-1)$th elementary
(Kapoor), 113
Symmetric matrices in the study of general matrices, the role of
(Taussky), 147
Symmetric norms for matrix rings, uniqueness of
(Deeds), 383

Tournament matrices, some remarks on
(Brauer, Gentry), 311

Variation, systèmes polarisés noyaux diminutifs de
(Atteia), 347
